Geometry Dash Vault Of Secrets Codes - Tutordale

Explanation: . The four interior angles in any rhombus must have a sum of degrees. The opposite interior angles must be equivalent, and the adjacent angles have a sum of degrees. Since, both angles and are adjacent to angle --find the measurement of one of these two angles by: . Angle and angle must each equal degrees. So the sum of angles and degrees.

How to find an angle in a rhombus - Intermediate Geometry

Explanation: . The first step is to sketch two circles touching at a single point. In order to maximize the length of , the point and the point would need to be on opposite ends, as shown in the diagram. If the radius of a circle is , then the diameter would be .Therefore, the length of would be .
