Therefore, Hodin emphasized that “society must realign for the 100-year life” because the younger generations are likely to live for 100 years, and they must be as healthy as possible. This is also the agenda of the UN Decade of Healthy Ageing (2021–2030), which is about all people—even those who have not yet been born—living as ...

Non-communicable diseases (NCD) risk factors in North Korea include high rates of urbanisation, an ageing society, and high rates of smoking and alcohol consumption amongst men.. Cardiovascular disease as a single disease group is the largest cause of death in North Korea (2013). The three major causes of death in DPR Korea are ischaemic heart disease (13%), lower respiratory infections (11% ...

Health in North Korea - Wikipedia

Is individual variability in PTC sensitivity due to the presence or absence of a receptor contained in the taste cells? Fox (1932) first suggested that the taste of PTC and other related compounds was closely connected with the presence of the C=5 group. Further investigations suggested the N—C=5 group might be more critical (Hopkins 1942, Harris and Kalmus 1949-1951) (see figure 1).

Our older patients have not only a different pattern of injury and more occult injuries but the physiology of ageing may not have the traditional parameters to trigger major trauma pathways. Older patients may have underlying hypertension, are less able to respond to hypoperfusion and are more likely to have heart rate controlling medication.
